THE HERITAGE

The heritage of SØHOLM Bornholm was in 1996 bought by and incorporated into the aida family.

Words such as: proud, craftsmanship, original, old recipes, secret formula, and significant history are setting the tone, and it is our duty to keep the story alive.

For more than 70 years, aida has presented timeless porcelain of good quality at affordable prices.

From the beginning, aida's philosophy has been to create beautiful and durable tableware.

A craftsmanship that lives up to both professional chefs and private food lovers daily requirements – be it in the kitchen or at the dinner table.

SØHOLM CONCEPT

Good craftsmanship and a sublime sense of shape and colour are part of the reason for SØHOLM's success. But behind the name is also a handful of secret formulas and unique glaze recipes that have survived for generations.

In 1996, SØHOLM became part of the aida family. There was a desire that the valuable knowledge from the almost 200-year old Bornholm stoneware factory should continue to be nurtured and transformed into stylish home accessories. This now happens every day when we proudly develop new and contemporary designs under the SØHOLM name in stoneware, porcelain, and glass, and ship them to customers worldwide.

SONJA GLASS

// SONJA GLASS

The beautiful SØHOLM Sonja fine art glassware is 100% handmade and mouth blown. The result is a collection of unique drinking glasses and champagne glasses. Style your table with one colour or mix and match.

The story began in 1968, when the children's television series "Sonja from Saxogade" captivated the Danish television viewers and shaped the first Sonja stoneware. Aida proudly presents an updated version of the iconic Sonja tableware. A memorable blue winter sky sets the tone of this visually stunning, high quality, modern stoneware collection with an organic touch from the timeless Danish design period.

CARE GUIDE

Taking good care of your belongings makes good sense. It prolongs their lifespan, which is good for your finances as well as the planet. Follow our care guide and keep your things beautiful and usable for many years to come.

PORCELAIN & STONEWARE

Porcelain and stoneware are sturdy materials burned at high temperatures. The higher the temperatures, the sturdier it gets, and our porcelain and stoneware are burned at very high temperatures above 1200° C. As long as you take certain precautions, our porcelain and stoneware are dishwasher, oven and microwave safe and can also go in the freezer. However, you should not put it into a preheated oven or directly from a warm oven onto a cool tabletop. Big temperature differences might cause it to crack and break, which is why it should always be heated up and cooled down slowly.

SODA GLASS

Our soda glasses are easy to maintain and dishwasher safe. Wash them with dishes and cutlery at temperatures below 55°C using a short programme. To prevent corrosion (glass disease), adjust your dishwasher to your water hardness and dose detergent, salt, and rinse aid correctly. Store glasses upright to allow them to breathe. A white coating may be lime deposits, removable with citric acid. Add 50 grams to the detergent compartment and run a cycle.
